

SURESH CHODHARY

PERSONAL INFO

Hi! I'm Suresh Choudhary, a MERN Stack Developer who enjoys creating fast, user-friendly websites and web applications. I specialize in building clean and responsive interfaces using React.js on the frontend, and robust, secure backends with Node.js and Express.js. I manage data efficiently with MongoDB and ensure seamless performance across applications. Alongside web development, I have experience with Python, C, and Java, and I'm currently exploring Machine Learning to develop smart, real-world solutions. I'm passionate about problem-solving, developing impactful projects, and constantly learning new technologies to grow as a developer.
